NANO VISTA LEVEL UP

Nano Vista #Indestructible levels up!

Discover **Level Up**, the latest evolution of Nano Vista #Indestructible. New colors, pearlescent effects, luminous highlights, and exclusive metallic, gold, and silver finishes transform the collection, giving it a fresher, more contemporary look and a stronger visual impact at the point of sale.

Nano #indestructible glasses **are made from Siliflex™**, our patented material that makes Nano glasses ultra-resistant, super flexible, lightweight and hypoallergenic. They always maintain their original shape even when stretched and twisted!

Designed to fit the morphology of children and teenagers, considering their day-to-day activities. More than **300 options** available to choose from! Includes an adjustable mini-strap and interchangeable strap by temples, for maximum enjoyment of all their activities!

Designed **100%**
childproof!

For **UNSTOPPABLE** boys and girls

NANO #indestructible

1

**Temples with
adaptable
and manually
adjustable tips.**

3 in 1

Includes both **full
strap** and
half strap!

2

Patented Hinge 3.0.
Maximum flexibility
with 360° rotation.

3

**Perfect adjustment
of the pantoscopic
angle.**

HYPOALLERGENIC

Measuring system for frames according to DIN EN ISO 8624.

MYOP-K

STATE-OF-THE-ART
PROGRAM TO MANAGE
THE PROGRESSION OF
CHILDHOOD MYOPIA

FOR A
BRIGHTER LIFE!

“Each increasing diopter can be a lost opportunity”

Myopia can severely affect children's quality of life, hindering their learning, sports performance, and affecting their confidence. In the long term, it can lead to serious problems¹ such as:

- Myopic maculopathy
- Retinal detachment
- Cataracts
- Glaucoma

Delaying its progression by 1 diopter during childhood reduces by 40% the risk of myopic maculopathy, the leading cause of irreversible vision loss in the world².

1. Flitcroft DI. The complex interactions of retinal, optical and environmental factors in myopia etiology. *Prog Retin Eye Res.* 2012;31:622-60.
2. Bullimore MA, Brennan NA. Myopia Control: Why Each Diopter Matters. *Optom Vis Sci.* 2019 Jun;96(6):463-465

THE PERFECT SYNERGY

The success of **MYOP-K** lies in its perfect synergy with **Nano Vista**, frames, forming an unbeatable combination. Our patented **Siliflex™** material is ultra-resistant, flexible, hypoallergenic, BPA-free, plant-based, and 100% recyclable, making our frames **#INDESTRUCTIBLE**.

Specifically designed for children, not just scaled-down adult glasses; we use children's facial scans for precise fitting at each growth stage.

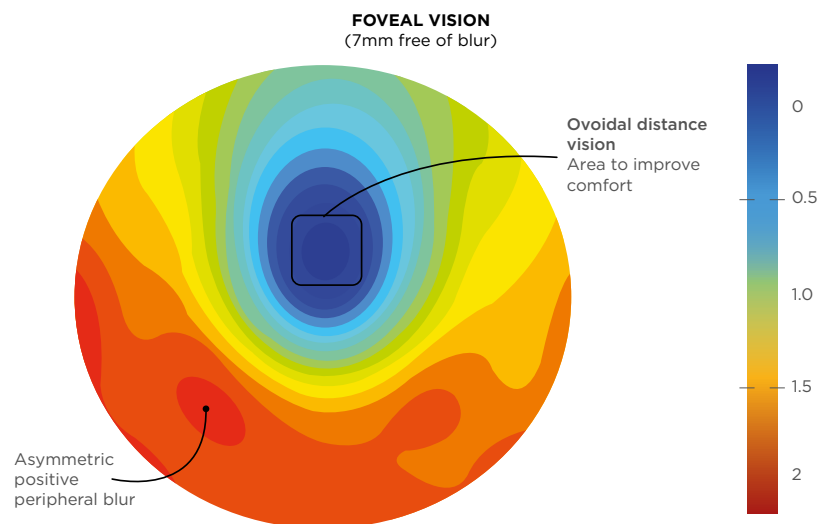

Additionally, each frame has an interchangeable band and mini-band. This **versatility** allows adaptation to children's active lifestyle and keeps the lenses in the correct position all day.

NANO VISTA MYOP-K

HOW DOES IT WORK?

Nano Vista MYOP-K was born after years of research and development. Its revolutionary technology is based on a clear central zone and peripheral defocus that ensures all light rays focus within the retina, preventing greater ocular elongation and thus slowing myopia progression.

3. In 73% of children, myopia increase was less than 0.25D after one year of use.
4. Prospective, controlled, randomized, double-blind clinical study led by the European University of Madrid with 83 children (clinical trial NCT05250206).

EFFICACY DEMONSTRATED IN EUROPEAN STUDIES⁴

The results of the first study on European myopic children speak for themselves:

- In 73% of cases, MYOP-K lenses managed to significantly slow myopia progression compared to standard monofocal lenses.
- 91% of children using MYOP-K had an increase of less than 0.5D in both eyes over one year.

Additionally, MYOP-K stood out for its **comfort, performance, and clarity**, ensuring effective myopia treatment and excellent adaptability.

73% Myopia significantly slowed after 12 months
